

YUVRAJ SHARDA

B.Tech Computer Science & Engineering | AI/ML & Python

Nabha, Patiala, Punjab, India | 7888908500 | yuvrajsharda5681@gmail.com

LinkedIn: Yuvraj Sharda | GitHub: yuvrajsharda11

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science Engineering student with practical exposure to **Python, Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks, NLP, IoT and Cybersecurity**. Currently pursuing industrial training at NIELIT Ropar. Experienced in developing academic projects involving machine learning, IoT-based monitoring and phishing/URL detection, with a strong interest in real-world AI/ML applications.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering

Baba Banda Singh Bahadur Engineering College, Fatehgarh Sahib, Punjab

Affiliated with I.K. Gujral Punjab Technical University

Expected 2027

CGPA: 7.5/10

(up to 6th Semester)

INDUSTRIAL TRAINING

Industrial Trainee — NIELIT Ropar, Punjab | Currently Pursuing, 2026

- **Training areas:** Python Programming, Artificial Intelligence & Machine Learning, Deep Learning, Neural Networks and Natural Language Processing (NLP).
- Gaining practical exposure through hands-on exercises and project-based learning in AI/ML and Python.
- Applying concepts related to machine learning, neural-network architectures, deep-learning techniques and NLP.

TECHNICAL SKILLS

Programming: Python

AI/ML: Machine Learning, Deep Learning, Neural Networks, NLP, Regression

Data Science: Pandas, NumPy, Scikit-learn

Web/App: Streamlit, Flask

Cybersecurity: Phishing Detection, URL Analysis, Threat Detection

IoT: ESP8266, MQ-135, DHT11, ThingSpeak

Tools: Git, GitHub, VS Code, PlatformIO

PROJECTS

AI-Based Phishing & URL Detection Platform

- Developed a cybersecurity application for detecting potentially malicious and phishing URLs.
- Worked on URL analysis and machine-learning-based risk assessment concepts.
- Designed the project toward a publicly accessible platform for security analysis and unified reporting.

IoT-Based Air Quality Monitoring System

- Built an IoT system using ESP8266 NodeMCU, MQ-135 air-quality sensor, DHT11 and 16×2 I2C LCD.
- Collected real-time air-quality, temperature and humidity readings and integrated data with ThingSpeak.
- Added an ML-based prediction component using temperature and humidity data.

Student Placement Predictor

- Developed a machine-learning application for predicting student placement outcomes.
- Used Python and Scikit-learn for preprocessing, model training and prediction, with a Streamlit interface.

Smartphone Price Predictor

- Developed an ML-based application to predict smartphone prices from selected features.
- Applied data preprocessing and regression techniques using Python and Scikit-learn.

ADDITIONAL TRAINING

Python & AI/ML Training — Future Finders, Mohali | 45 Days

- Practical training in Python programming, AI/ML concepts, data handling and machine-learning applications.

CORE STRENGTHS & LANGUAGES

Strengths: Problem Solving, Analytical Thinking, Quick Learning, Teamwork, Project Development, Adaptability

Languages: English, Hindi, Punjabi
